OBJECTIVE

Product Manager with a proven track record of building and scaling SaaS logistics solutions that cut costs, improve efficiency, and delight customers. I bring a unique blend of **technical expertise (3+ years in software engineering)** and **product leadership (SaaS, logistics, dispatch optimization)**, enabling me to translate complex business needs into scalable products. Skilled in **product lifecycle management, roadmap execution, stakeholder alignment, and Agile delivery**. I thrive on solving ambiguous problems with structured, data-driven approaches while keeping user experience at the core.

EDUCATION

Bachelor of Technology in ICT, DAIICT 2018 – 2022
CGPA: 7.64

SKILLS

Product Management	Agile/Scrum Methodologies, Product Roadmaps, Feature Prioritization, User Story Writing, PRD Development, Stakeholder Collaboration, Cross-Functional Team Leadership, A/B Testing, Market Analysis, Azure DevOps and JIRA, Strategy, Agile (Scrum)
Technical Proficiency	REST API, GraphQL, Microservices, Node.js, Express, Elasticsearch, Event-Driven Architecture, Kafka

EXPERIENCE

Associate Product Manager (Hybrid Role) Delhivery PVT Ltd.	March 2025 - present Gurugram, Haryana
--	---

- **Owned Product lifecycle** of dispatch visibility for BIRA 91 by designing a **deviation reporting system** for riders and dispatches, enabling managers to **measure planned vs. actual delivery times** and distances; cutting inefficiencies and improving customer satisfaction for our client.
- **Drove roadmap and feature delivery** of **zone-based routing** for IOCL, **collaborating with engineering and ops**; allowing LPG deliveries to be restricted to geo-polygons. improved routing compliance and on-time deliveries in villages and remote locations.
- Reduced manual planning time from hours to minutes by creating an **automated dispatch planner**, which auto-assigns orders, vehicles, and drivers. This streamlined dispatch launches and cut human errors by **90%**.
- **Maximized fleet utilization** for IOCL by introducing **multi-run routing**, allowing vehicles to complete back-to-back routes. managed whole product from research to making PRD to implementation and feedback optimization. Result: higher vehicle efficiency and smoother high-volume deliveries.

Software Developer Delhivery PVT Ltd.	August 2022 - present Gurugram, Haryana
---	--

- Built a **notification service** that sent order updates via SMS or WhatsApp, ensuring real-time communication and improved customer experience.
- Designed and rolled out a **config management SDK** across 17+ microservices, cutting integration time and eliminating **80% of config-related bugs**; directly improving reliability and deployment speed.
- Led the development of **Auto Dispatch Service** that automated last-mile delivery for warehouse managers, scaling operations to handle **thousands of daily shipments without manual intervention**.

- Introduced a feature flag system to manage tenant-level features across 15+ microservices, enabling targeted roll outs and **A/B testing** and accelerated **go-to-market** timelines to support product experimentation and flexible deployments.

Software Developer Intern

Delhivery PVT Ltd.

Jan 2022 - June 2022

Gurugram, Haryana

- Enhanced system reliability through unit testing with Jest and Mocha for four microservices.
- Built a multi-tenant configuration service with **ScyllaDB**, optimizing data access.

Summer Research Intern

Prof. Kalyan P. Sashidhar

July 2021

DAIICT, Gandhinagar, Gujarat

- Conducted UI/UX research on smartphone usability challenges for elderly users, analyzing interview data to understand pain points and resolution strategies.

AWARDS AND ACHIEVEMENTS

- Circle of Excellence Q2, 2024 (for revamping Web EOD)
- Performer of the Month, March 2024 (for elastic index revamp)

LEADERSHIP

- **Mentored 2 interns**, conducted **daily scrums**, and authored and co authored PRDs and TRDs; helping them transition into full-stack contributors while ensuring high delivery standards.
